

A product line so unique others will be green with envy.

BAMBOO

NATURE-FIL

Batting, Pillow Forms and Fiberfill

The bamboo story begins with its naturally antibacterial property, which is retained by the ultra-soft finished fibers. As the fastest growing plant on earth with the ability to absorb 2/3 more carbon dioxide and release 2/3 more oxygen than any other plant, bamboo is the clear leader among plant species for positive environmental impact. Bamboo is processed into luxurious fiber using pollution-free methods with little waste. It is truly a green product that lives up to and beyond expectations.

Bamboo Fiberfill

Strong, high-luster fibers with a uniquely soft, silky texture that won't bunch or clump. The perfect fiberfill for sewing and craft projects.

Bamboo Batting

Luxurious batting gives quilts and clothing breathability to keep you toasty in colder climates and comfortably cool in warm climates. An ideal batting for machine quilting that features a needlepunched fiber blanket with a smooth drape and a thin scrim to prevent stretching and bunching.

- ◆ 50% bamboo and 50% organic cotton blend batting
- ◆ Machine washable - estimated shrinkage 2-3%
- ◆ Quilting distance up to 8"

Bamboo Pillow Forms

Professional decorator results and a silky soft texture for lounging comfort and long lasting beauty.

- ◆ 100% cotton cover
- ◆ 100% bamboo fiber filled

As the leading manufacturer of batting, fiberfill and pillows for more than 60 years, we feel it is our responsibility to continuously lead the industry in the discovery and development of innovative new fibers. As corporate and community citizens we seek to develop earth-friendly products that satisfy consumer demand for superior performance while focusing on renewable, natural fibers and green manufacturing processes to preserve our planet for your family and ours. Fairfield is crafting for the next generation.

A portion of the proceed from the sale of these items will be used to support environmental and ecological initiatives.
