

Stained Glass Flowers

Cutting

1. Cut one 12½" square of blue floral print. Cut one 10" square of light blue. Using curved template, mark curve in corners of small square. Cut away corners. Trace stained glass design to light blue piece.
2. Trace daffodil petals, daffodil center, tulip, tulip center, flower, flower center and leaves in reverse to paper-backed fusible webbing. Fuse daffodil petals to light yellow, daffodil center to gold print, tulip to rose, tulip center to dusty pink, flower to purple, center to purple print, leave 1 to dusty green and remaining leaves to teal green. Cut out shapes.
3. From black fabric, cut seven 1" x 25" bias strips.

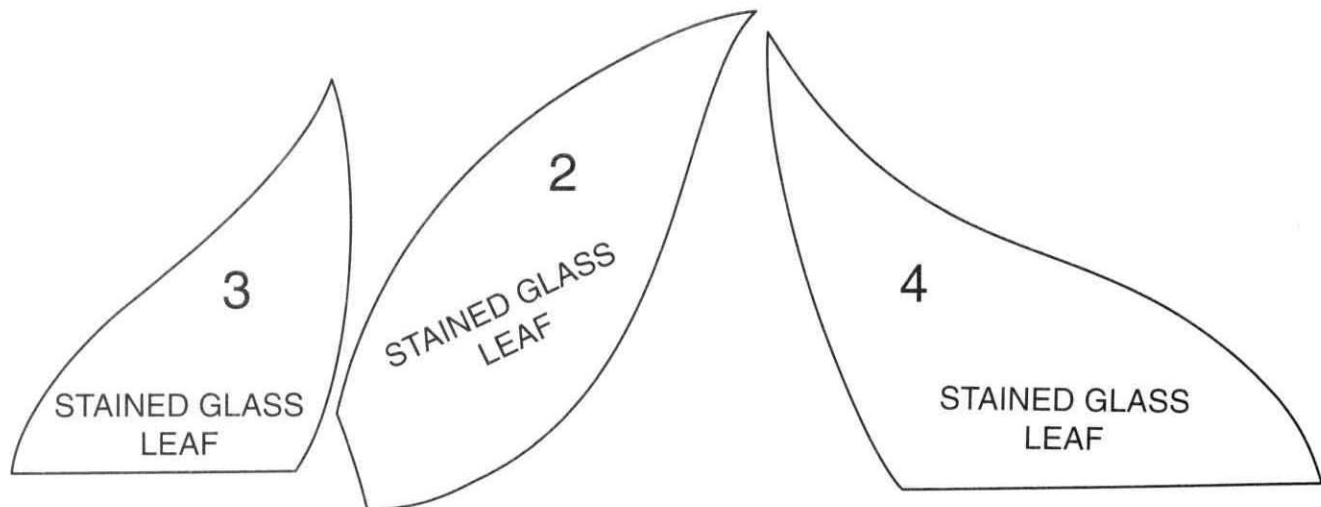

Directions

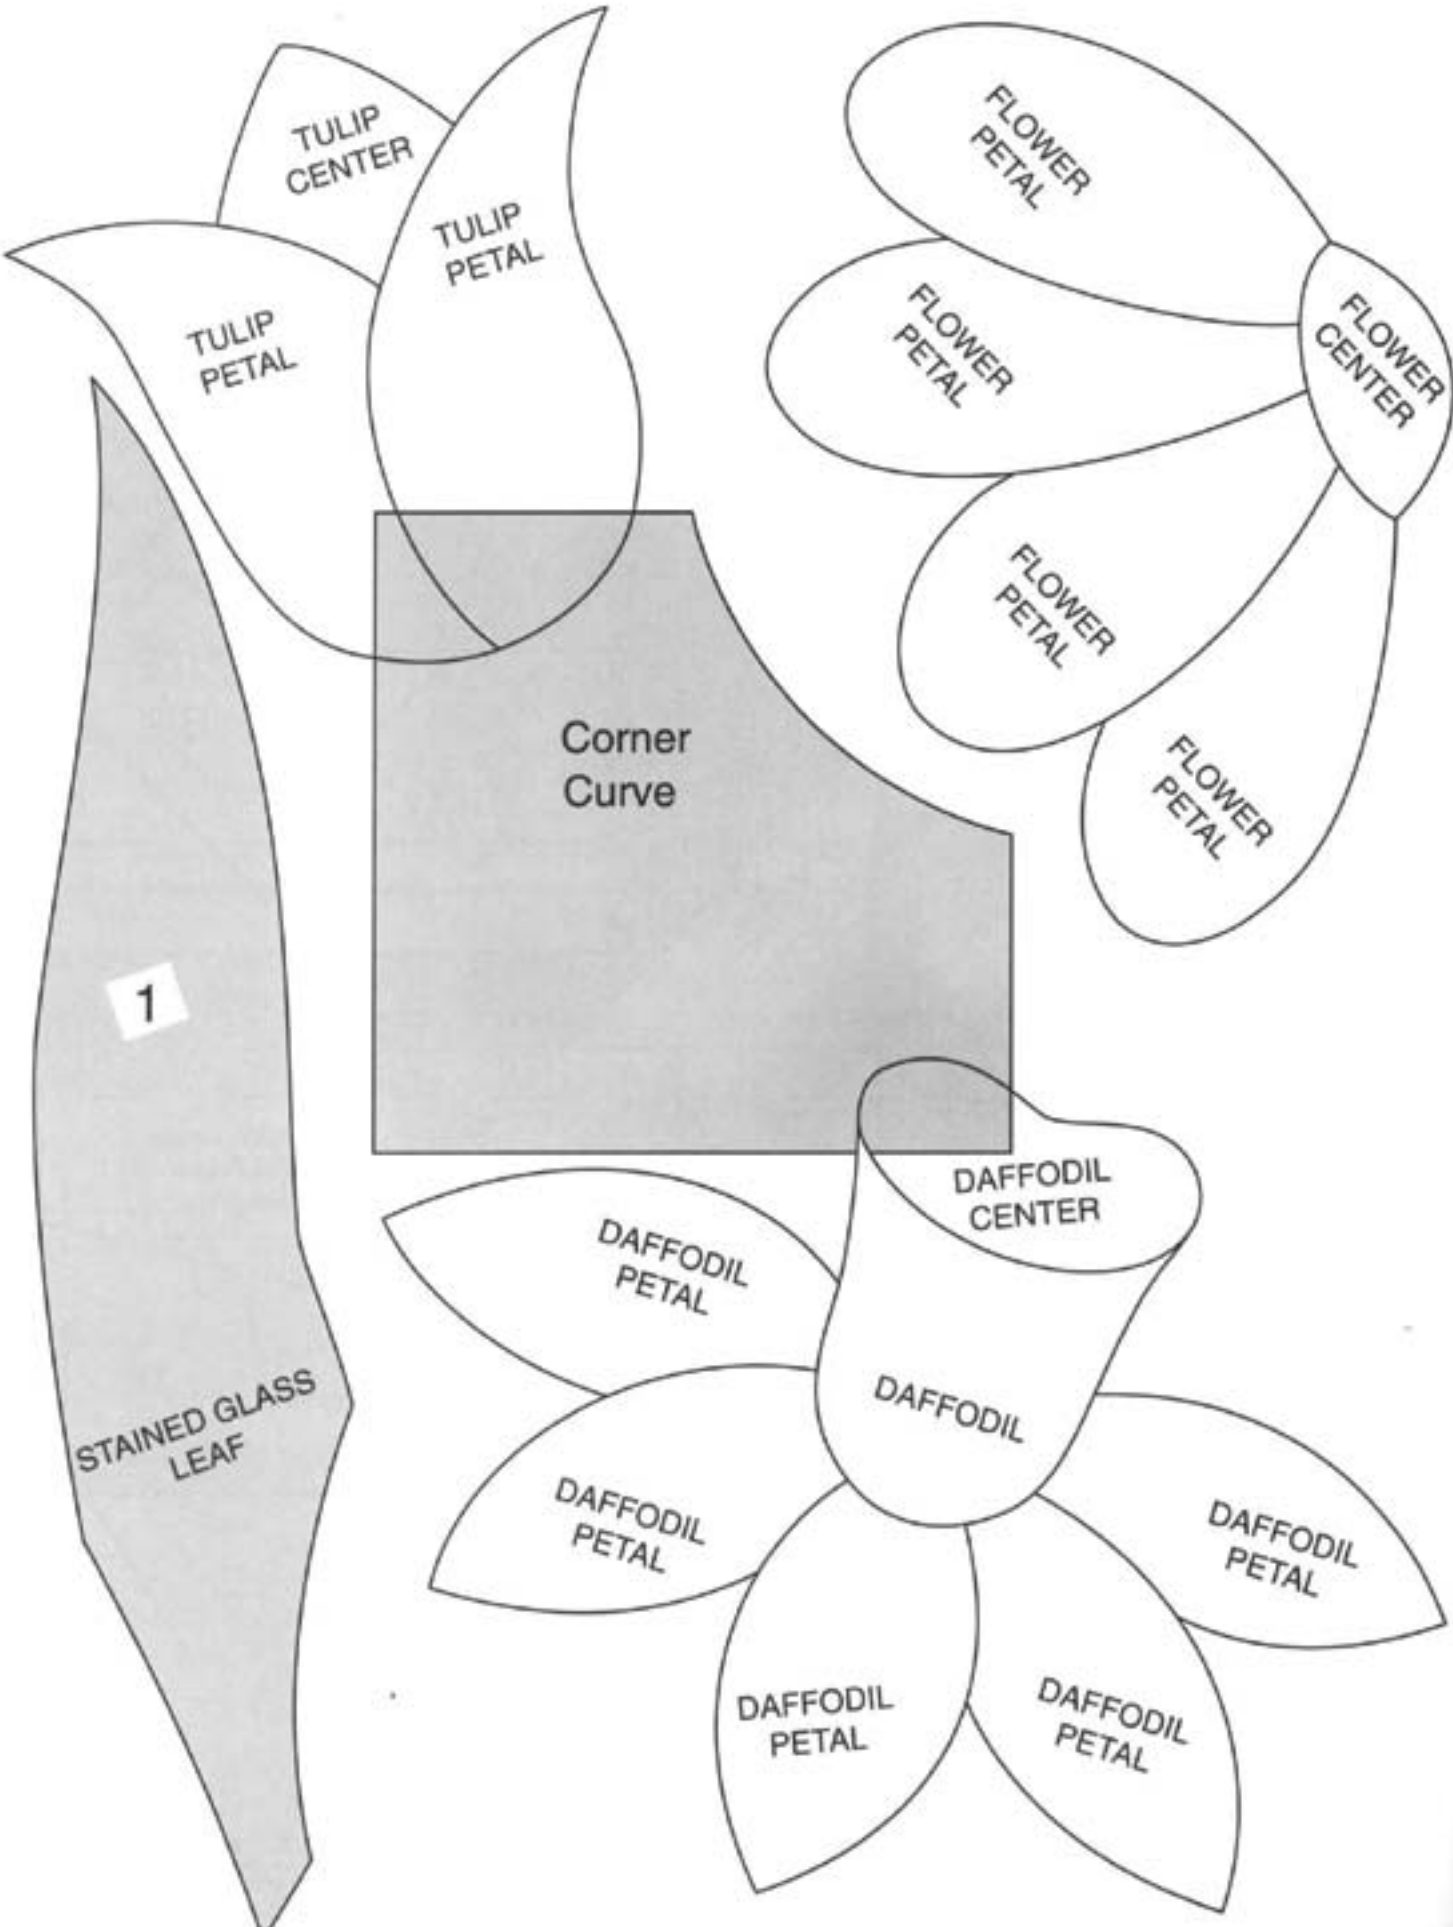

1. Place light blue shape in center of blue floral square. Baste in place along edges. Trim floral fabric from center ¼" inside stitching.
2. Fuse leaves and flowers to position on light blue center.
3. To make leading for stained glass, fold black bias strips in half lengthwise and stitch ¼" from fold. Trim seam allowance to ⅛". Press. (Refer to Urn block on page 10 for detail.)
NOTE: You can pin, baste or simply hold leading

strips in place as you sew. For curved lines, we recommend basting the leading strips. Then sew them in place using invisible machine appliqué stitching (set machine on blind hem stitch). If desired, pin or hold tape in place and slipstitch the edges of the tape to the background.

4. Position leading along the straight lines on background so they overlap edges of flowers and leaves slightly. Sew in place.
5. Stitch leading around leaf number 1. Then stitch leading along stems of flowers.
6. For daffodil, stitch leading around petals beginning at outer edges. Sew center petal last. Sew leading around center.
7. For flower, stitch leading around petals beginning at right side and working left. Sew leading around center.
8. For tulip, stitch leading along edge of center. Then sew leading around tulip beginning at upper center and ending at lower center.
9. Sew leading around leaves in numerical order.
10. Sew leading around edge of light blue center.
